Summary

I'm a tech enthusiast, with a keen interest in helping businesses solve problems using technology. I'm interested in a career in technology because it provides an opportunity to combine my analytical and creative skills.

My frustration of using buggy software fuelled my passion to specialise in Quality Assurance testing, my motivation in QA is driven by the serious implications of a software bug in different industries.

I'm versatile, flexible and a collaborative team player. Dedicated to improve my skills.

I'm able to work independently and as a team member.

I'm curious, investigative and pay attention to detail.
